

Date:

Wednesday Challenge Form

Group Members: Malik and Krish

Problem Statement: Use another group's sketch Up to build an E out of Cardboard, only using a box cutter.

Approach: We measured all the dimensions of the E given to us and drew it on a piece of cardboard then cut out the E

Solution: We got third place on the challenge. We were 6/16 inches off.

Lessons Learned: We need to be more precise With our measurements, and clean with our cuts
