Wednesday Challenge Form

Group Members: Keila, Carlos, Edgar, and Trevor

Problem Statement: Get a plywood block and make it as close to two inches as possible using any available resources, except for power tools.

Approach: We measured the wooden block to 2 inches and we used a hand saw to cut. We drew a line that come as close too two inches as we can get. Then we used sandpaper to sand it down to that line.

Solution: The first block we were approxemtely one thousandth of a millimeter of

Lessons Learned: I learned that next time I should sand a tiny bit more.
